MALAYSIA LACKS OF AI EXPERTS

Why Malaysia Facing Stortage of AI Experts?

- + Limited AI programs
- + Attractive Overseas Opportunities

Solutions to Overcome the Shortage of AI Experts

Recruit back the AI experts

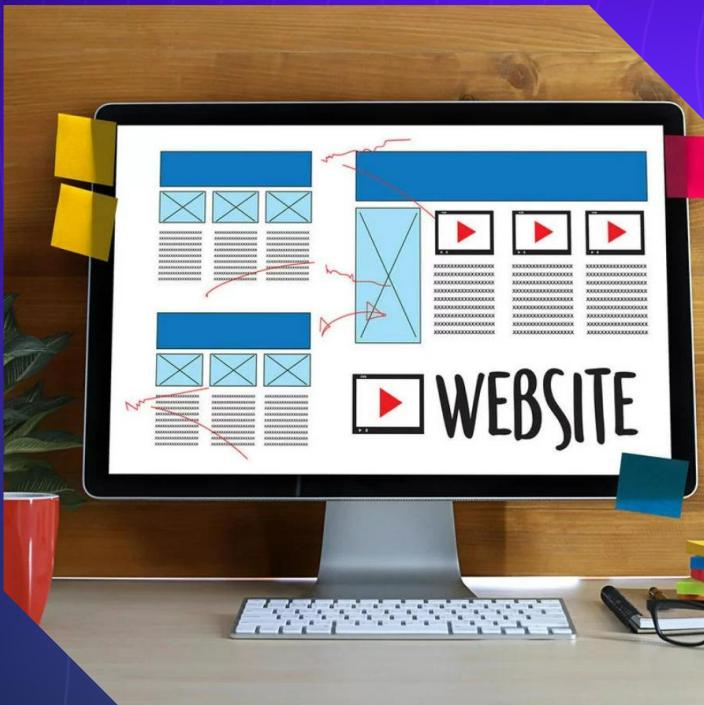

Due to brain drain problem, Malaysia should pay competitive salary , giving great titles and posts, and establishing attractive employment contract to those experts.

Focus on the improvement of UM's AI Department

Since Universiti Malaya(UM) already has an AI department, government should focus on improving that department.

Create an website focused on AI

This website provides million of AI
research article from AI insitutions
all over the world.

Potential Challenges of the Solutions

AI experts reject to return Malaysia

They need to sacrifice their circle of friends, comfort zone and stable job.

Lack of Local Infrastructure

Since Malaysia lack of specialized facilities, the AI development process will be slow.

About Us

Founded by a team of AI enthusiasts, our website is driven by the belief that knowledge should be accessible to all. Whether you're an AI novice or an industry expert, we strive to provide a comprehensive and user friendly platform that caters to a broad audience. Our commitment is to sift through the abundance of information online, bringing you thoughtfully selected articles that offer valuable insights into the world of AI.

Our Goals

Foster a community by encouraging users to engage or discuss articles

Keep users informed about the latest published articles

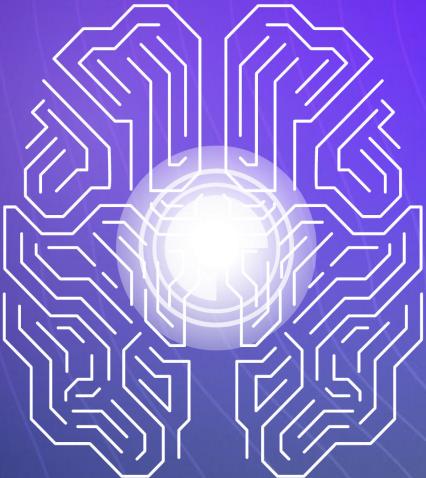

Offer thought-provoking ideas that inspire and drive innovation

Conclusion

The shortage of AI experts in Malaysia is not an impossible problem to be addressed. By actively recruiting back those AI experts who are working abroad, undoubtedly that they can bring a great contribution to Malaysia's AI field by sharing their professional insights. In addition, by improving the AI department in UM, it continuously cultivates skilled professionals in AI field. The AI website can be a great platform to those AI experts to share their research and knowledge. By and large, hopefully Malaysia keep putting effort in AI development, not only for better economic growth, but also the better quality of Malaysian life.
